# Configura®
Comfort

Information & Assessment Form

USER GROUP

To provide comfortable seating to users with mild to moderate postural requirements, to help reduce the formation of pressure ulcers and help to stand or sit users with limited mobility.

APPROPRIATE FOR:

USERS AT RISK OF PRESSURE DAMAGE
Subject to professional assessment, users with current pressure damage

AMBULANT, SEMI-AMBULANT & NON-AMBULANT USERS

ACCOMMODATION & ENCOURAGEMENT OF GOOD POSTURE

USERS WITH OEDEMA LEGS AND/OR FLUID BUILD-UP

USERS WITH A KYPHOSIS

USERS WITH NEUROLOGICAL CONDITIONS

NOT APPROPRIATE FOR:

1 Demanding postural requirements

2 Users with fixtures and contractures

3 Users with a limited extension at the knees

4 Users who need to be transported from room to room

5 Bariatric users

INTENDED ENVIRONMENT

Domestic use

Care homes or nursing homes

STANDARD CHAIR SPECIFICATION

Configura® Comfort is the latest innovation from Accora and provides an unprecedented level of functionality and cost effectiveness.

Comfort is the result of acting on feedback collected from our customers over the past 5 years and it includes many features you have been asking for as standard.

'Reduced shear' recline to maximise pelvic stability

Integrated self-supply overlay for easy integration of existing cushions*

Compatible with transfer aids including Cricket, ReTurn 7500 and Molift Raiser

Knock down design for easier storage and single person delivery

Pressure reducing fabric on backrest and armrest as standard

Colour matched vapour permeable vinyl

Castors for easy manoeuvrability

More depth adjustment options using backrest brackets. Reduces the need for depth adjustment kits

SIZE

Key thoughts:

- 3 measurements are required for selecting a chair; seat depth, seat height and seat width – see below drawings for clarity.

- When selecting a chair size, prioritise the chair measurements in the following order: seat depth, seat height then seat width. This will ensure the selected size is the right overall proportion for the user

- If you cannot find the size you need, check out the other chairs in our range or contact us as we may be able to supply a special size.
Seat depth	Seat height	Seat width

Chair Size	Part Number	Seat Depth	Seat Height	Seat Width	Weight Capacity
SMALL	CR5422	457 mm (18")	406 mm (16")	457 mm (18")	130 kg
			431 mm (17")*		
		508 mm (20")	457 mm (18")**		
MEDIUM	CR5424	457 mm (18")	457 mm (18")	508 mm (20")	160 kg
			482 mm (19")*		
		508 mm (20")	508 mm (20")**		
LARGE	CR5426	457 mm (18")	457 mm (18")	559 mm (22")	160 kg
			482 mm (19")*		
		508 mm (20")	508 mm (20")**		

Position	Part Number
* Position 1	CA2421
** Position 2	CA2422

*Includes' 1" Height Adjustment Kit CA2421.
**Includes 2" Height Adjustment Kit CA2422.

Seat depth is adjustable by 50 mm (2") as standard without extra parts.

enable lifecare
Fast intelligent care

Description	Long description	Part number		Select
25 mm (1") Height Adjustment Kit	Increases seat height 1" (25mm) or 2" (50mm), fits all sizes. Castors are raised off the ground when height adjustment kit is used	25mm - CA2421		☐
50 mm (2") Height Adjustment Kit		50mm - CA2422		☐
50 mm (2") Depth Adjustment Kit	Decreases depth by further 51 mm (2").	CA2416		☐
PRESSURE

Key thoughts:

■ Selection of pressure cushions is a clinical decision which involves many variables including a risk assessment tool. Professional input from a Tissue Viability Nurse or District Nurse may be required at this stage.

■ Vapour permeable fabric as standard on seat base, legrest, backrest and armrests.

PRESSURE CARE OPTIONS

Description	Long description	Part number		Select
Visco (std)	**Prevention:** Heat sensitive memory foam moulds to the user providing maximum support and pressure reduction. Suitable for users who are at risk of pressure damage. 160kg (25 stone) weight capacity.	N/A – standard part		☐
Integrated Self Supply	Allows integration of self-supply cushion of approximate dimensions 17.5" x 17.5" x 3". (Professional input required. See page 11 for instructions).	N/A – standard part		☐
Cushionair - Alternating Seat Cushion with Pump	**Management:** powered air cushion for users who have developed pressure damage. Weight capacity: 160 kg.	Fits all sizes CA2400		☐
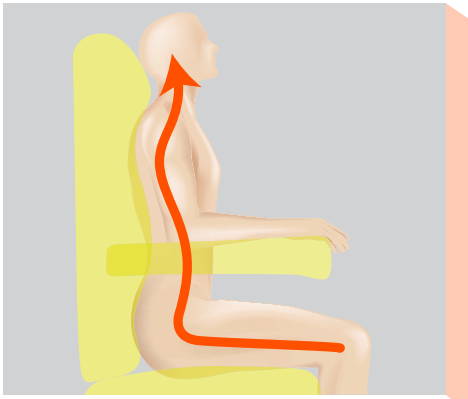

POSTURE

Key thoughts:

- Tilt-in-space can significantly improve midline sitting so increased lateral support may not be necessary if the user tends to slump mildly to one side.

- The Multi-adjustable Pillow Backrest is more adjustable than the Lateral Support Backrest and Adjustable Lateral Support System because filling can be removed to accommodate different postural requirements.

POSTURE MANAGEMENT OPTIONS

Description	Long description	Part number		Select
Multi-adjustable Pillow Backrest (std)	**Accommodation:** accommodates posture that has already developed i.e. kyphosis; our most popular backrest.	N/A Standard Part		☐
Lateral Supports	**Accommodation:** used under the Multi-adjustable Pillow Backrest cushions to provide moderate postural support **Sold as each.**	CA2413		QTY 1 ☐ QTY 2 ☐
Lateral Support Backrest	**Encouragement:** encourages a good midline sitting position for users whose posture is flexible.	Small CA2406 Medium CA2407 Large CA2408		S ☐ M ☐ L ☐
Adjustable Lateral Support Backrest	**Management/correction:** contoured foam backrest with adjustable Velcro Lateral Supports. Provides more aggressive lateral support and mild positioning/correction. Supplied with breathable, pressure reducing fabric.	Small CA2410 Medium CA2411 Large CA2412		S ☐ M ☐ L ☐
Profiled Headrest	Suitable for users with reduced lateral head control. Fits over the shoulders.	Fits all sizes CA2419		☐
2-Button Handset	Suitable for Cognitive Impaired person e.g. dimentia (Chair comes Standard w/ 4-button Handset).	Fits all Chair Sizes SC2316		☐

EXTRAS

Description	Long description	Part Number		Select
Armrest overhang on outside (std)	Provides a good grip to assist the user rolling from side to side for easier fitting of slings.	Standard Part		☐
Armrest overhang on inside	Reduces width between armrests by approximately 38 mm (1.5"). Provides extra arm and elbow support if the user is 'pear shaped' or very thin.	Standard Part		☐
Right hand control (std)	N/A	Standard Part		☐
Left hand control	N/A	Standard Part		☐
Carer control	Fitted to backrest out of user reach	Standard Part		☐
Rise (std)	23° of tilt. The most frequently used rise setting. This provides a gentle, progressive movement.	Standard Part		☐
Medium rise	14° of tilt. There is not a specific user group for this setting – it is normally used if 'Rise' or 'Flat Rise' is inappropriate.	Standard Part		☐
Flat rise	2° of tilt and 254 mm (10") of rise, used for users with Muscular Dystrophy who need to lock knees before transferring. (Not available on Small chair)	Standard Part		☐
Legrest Setting 1.	Standard Position	Standard Part		☐
Legrest Setting 2.	Standard Position + 25 mm (1")	Standard Part		☐
Legrest Setting 3.	Standard Position + 50 mm (2")	Standard Part		☐

CLEANING INSTRUCTIONS FOR THE FABRIC

Clean and care for the fabric on a regular basis and it will maintain its condition and appearance.

The new generation of Microfibre cleaning cloths without soap are extremely effective for general care and maintenance. You can also wipe clean regularly with a damp cloth to remove dust particles and light soiling. It is recommended to vacuum the upholstery once a week.

Most stains can be removed by wiping clean. Remove spillages promptly (within 15 minutes) with cold water. For extreme soiling control use a 5% Sodium Hypochlorite (Bleach) solution.

Do not machine wash or dry clean.

Do not apply other chemicals such as polish, solvents or stain remover.

INTEGRATED SELF-SUPPLY OVERLAY

The integrated Self Supply Overlay comes as standard on all chairs.
This allows for easy integration of existing cushions.
The size of the aperture is 445 mm x 445 mm x 76 mm (17.5" x 17.5" x 3").

This means the height of the seat and armrests remain unchanged when using another cushion.

STEP 1
Remove the backrest cushions.

STEP 2
Unzip the cushion cover to expose the foam.

STEP 3
Pull the foam out carefully, starting at the rear and cut the perforations at the front.

STEP 4
This leaves the cut out for the existing cushions to be inserted. Insert the cushion and re zip the cover.
